

Numerical algorithms for viscoplastic fluids

$$\min_{u \in H_0^1(\Omega)} J(u)$$

$$J(u) = \int_{\Omega} |\nabla u|^2 dx + \sigma_0 \int_{\Omega} |\nabla u| dx - \int_{\Omega} fu dx$$

min : J is non-differentiable : $j(x) = x^2 + \sigma_0|x| - fx$

- operator splitting
- automatic adaptive mesh

Volcanic lava flow simulation
